# Simplified: Test Sample

Generated by PDF Summarizer

PDF Summarizer Test Document 1. Introduction This is a sample PDF document made to test how the PDF processing system works from start to finish. The system takes text out of PDF documents, breaks the content into smaller parts, and sends each part to the

2. Architecture Overview - Backend: Made with FastAPI, PyMuPDF, ReportLab, and httpx. - Frontend: Made with React, Vite, and Tailwind CSS. - AI Integration: Uses OpenRouter API with Meta-Llama models to summarize text well.

3. Verification Steps - Upload a PDF file to /api/v1/upload - Take apart the pages and make smaller chunks - Start simplifying the document using /api/v1/simplify/{file_id} - Download the new PDF using /api/v1/simplify/{file_id}/download
