PDF Summarizer Test Document

1. Introduction
This is a sample PDF document created to test the end-to-end PDF processing pipeline.
The pipeline extracts text from PDF documents, splits the content into logical chunks, sends each chunk to the C

2. Architecture Overview
- Backend: Built with FastAPI, PyMuPDF, ReportLab, and httpx.
- Frontend: Built with React, Vite, and Tailwind CSS.
- AI Integration: Uses OpenRouter API with Meta-Llama models for high quality text summarization.

3. Verification Steps
- Upload PDF file to /api/v1/upload
- Extract pages and generate chunks
- Trigger document simplification via /api/v1/simplify/{file_id}
- Download generated PDF via /api/v1/simplify/{file_id}/download
